The image shows a Visual Studio Code editor window with a project named 'COLLEGE_PROJECT'. The Explorer sidebar on the left lists files: 'Welcome', 'dbcollege.js', 'faculty.js', 'library.js', 'marks.js', 'student.js', 'index.js', 'package.json', 'package-lock.json', and 'node_modules'. The 'dbcollege.js' file is open in the editor, showing the following code:

```
110
111 const mysql = require('mysql');
112
113 var connection = mysql.createConnection({
114     host: 'localhost',
115     user: 'root',
116     password: 'info123',
117     database: 'college2'
118 });
119
120 connection.connect(function (err) {
121     if (err) throw err;
122
123     connection.query("delete from faculty where FacultyName='prof.paratik'", function (err, result) {
124         if (err) throw err;
125         console.log(result);
126     });
127
128     connection.query("delete from marks where StudentName='shivani'", function (err, result) {
129         if (err) throw err;
```

The bottom of the image shows the integrated terminal with the command prompt 'PS D:\College_project> node dbcollege.js' and the following output:

```
message: '',
protocol41: true,
changedRows: 0
}
OkPacket {
  fieldCount: 0,
  affectedRows: 1,
  insertId: 0,
  serverStatus: 34,
  warningCount: 0,
  message: '',
  protocol41: true,
  changedRows: 0
}
```
